## Table of Contents

<b>1.0</b>	<b>Introduction .....</b>	<b>1</b>
1.1	Manufacturing Approaches.....	2
1.2	Characteristics of Electronic Paper.....	3
1.2.1	Reflectivity.....	3
1.2.2	Contrast.....	6
1.2.3	Resolution .....	7
1.2.4	Human Response to Electronic Paper.....	9
1.2.5	Writing and Drawing on Electronic Paper .....	10
1.3	The Attributes of “Paper-Like Displays” .....	12
<b>2.0</b>	<b>The History of Paper .....</b>	<b>15</b>
2.1	Trends in the Markets for Traditional Paper .....	16
2.2	The Costs of Using Paper.....	23
<b>3.0</b>	<b>Markets for Flexible Displays.....</b>	<b>27</b>
3.1	Wrist-Worn and Other Wearable Displays.....	30
3.2	Smart Cards, Labels and Tickets.....	33
3.2.1	Smart Cards.....	33
3.2.2	Smart Labels and Tickets .....	40
3.3	Electronic Books (eBooks).....	52
3.4	Signs and Information Displays .....	59
3.4.1	Simple Informational Signs .....	59
3.4.2	Advertising Posters and Billboards .....	61
3.4.3	Narrowcasting .....	66
3.4.4	Sales of Traditional Flat Panel Displays into the Signage Market.....	68
3.5	Embedded and Automotive Displays.....	70
3.6	Military Applications .....	75
3.7	Immersive Displays.....	79
3.8	Demand Forecast .....	80
<b>4.0</b>	<b>Emissive Displays .....</b>	<b>85</b>
4.1	Small Molecule OLEDs.....	87
4.2	Polymer Displays .....	95
<b>5.0</b>	<b>Liquid Crystal Displays.....</b>	<b>99</b>
5.1	Passive Matrix Panels on Flexible Substrates.....	99
5.2	Active Matrix LCD on Plastic Substrates .....	104
5.3	Bistable Liquid Crystal Displays.....	105
5.3.1	Cholesteric Displays .....	105
5.4	Polymer Stabilized Cholesteric Displays .....	109
5.5	Surface-Stabilized Cholesteric Texture Displays.....	111
5.6	Bistable Nematic Displays .....	113
5.6.1	Nemoptic.....	113
5.6.2	Zenithal Bistable Display (ZBD).....	117
5.7	Ferroelectric Displays .....	119
<b>6.0</b>	<b>Bistable Reflective Displays.....</b>	<b>121</b>
6.1	Electrophoretic Displays .....	122
6.1.1	Encapsulated Electrophoretic Displays .....	122
6.1.2	Monochrome Performance .....	123

6.1.3	Color Performance.....	124
6.1.4	Video Performance .....	126
6.1.5	Resolution .....	127
6.1.6	Gray Scale and Stability .....	127
6.1.7	Backplane Requirements.....	128
6.1.8	EPD on Flexible Substrates.....	129
6.1.9	Roadmaps for Development and Products.....	130
6.2	Microcup Electrophoretic Displays.....	132
6.2.1	Driving Microcup Displays .....	133
6.2.2	Full Color Microcup Displays .....	134
6.2.3	Environmental Stability .....	135
6.3	In-Plane Electrophoretic Displays.....	137
6.4	Quick-Response Liquid Powder Display.....	141
6.5	Rotating Balls.....	142
<b>7.0</b>	<b>Electro-Wetting.....</b>	<b>147</b>
7.1	Electro-Polymeric Shutter Display .....	151
7.1.1	Electrochromic Displays .....	151
7.2	Nanochromic Displays .....	153
7.3	pH Indicator Dye Displays .....	155
<b>8.0</b>	<b>Mechanical Modulation.....</b>	<b>157</b>
8.1	Interferometric Modulation .....	157
<b>9.0</b>	<b>Flexible Substrates.....</b>	<b>161</b>
9.1	Flexible Backplane Characteristics.....	162
9.1.1	Process Temperature Tolerance .....	164
9.1.2	Coefficient of Thermal Expansion.....	169
9.1.3	Rigidity .....	170
9.1.4	Moisture Uptake.....	171
9.1.5	Optical Transparency.....	172
9.1.6	Optical Birefringence .....	174
9.1.7	Porosity .....	174
9.1.8	Chemical Resistance .....	175
9.1.9	Surface Roughness .....	176
9.2	Barrier Coatings for Flexible Substrates .....	178
9.3	Thin Film Encapsulation .....	184
9.3.1	Hybrid Multi-layer Films .....	184
9.3.2	Inorganic Films.....	187
9.4	Ultra-Thin Glass.....	189
9.5	Metal Foils .....	191
9.6	Sealants.....	193
9.6.1	Desiccants .....	194
<b>10.0</b>	<b>Electronic Backplanes .....</b>	<b>197</b>
10.1	Segmented Displays and Passive Matrix .....	197
10.2	Amorphous Silicon TFTs .....	198
10.2.1	Honeywell's Flexible a-Si Backplanes for AMOLEDs.....	198
10.2.2	Ignis Innovation's a-Si Flexible Substrates.....	200
10.2.3	Kyung Hee University: a-Si on Plastic .....	203
10.2.4	Digital Lithography .....	204
10.3	Low Temperature Poly-Silicon.....	206
10.3.1	FlexIC's Ultra-Low Temperature Process.....	206

10.3.2	Poly-Si TFTS on Metal Foils .....	209
10.3.3	Transfer Techniques .....	211
10.4	Organic TFTs.....	216
10.4.1	Pentacene TFTs .....	216
10.4.2	Polyarylamines.....	227
10.4.3	Thiophenes .....	230
10.4.4	Polyfluorene .....	233
10.5	Conductors .....	237
10.5.1	ITO .....	237
10.5.2	Carbon Nanotubes.....	241
10.5.3	Thin Metal Films.....	244
10.5.4	Bus Lines .....	245
10.6	Power Sources .....	247
<b>11.0</b>	<b>Manufacturing Processes.....</b>	<b>251</b>
11.1	Ink-Jet Printing.....	252
11.1.1	Ink-Jet Heads.....	253
11.1.2	Inks.....	261
11.1.3	Film Morphology and Substrate Interactions .....	263
11.1.4	Printer Systems.....	266
11.1.5	Test Results .....	270
11.2	Fabricating TFTs Using IJP .....	272
11.3	Transfer Processes.....	278
11.3.1	Laser Induced Thermal Imaging (LITI) Process .....	278
11.3.2	Flat Bed Scanners with Laser Diodes.....	282
11.3.3	Thermal Multi-Layer Patterning Process .....	285
11.4	Other Printing Methods.....	287
11.5	Traditional High-Speed Printing Processes .....	289
11.5.1	Screen Printing .....	290
11.5.2	Flexography .....	291
11.5.3	Gravure .....	292
11.5.4	Offset Lithography.....	293
<b>12.0</b>	<b>Roll To Roll Processing .....</b>	<b>297</b>
12.1	Web Handling .....	301
12.1.1	Web Positioning .....	303
12.1.2	Web Damage .....	305
12.2	Process Set .....	309
12.2.1	Substrate Cleaning and Preparation.....	310
12.2.2	Coatings.....	311
12.2.3	Lithography .....	315
12.2.4	Patterned Deposition .....	318
12.2.5	In-Line Measurement Tools .....	322
12.3	Strategic Development Efforts.....	325
12.3.1	USDC Infrastructure Support.....	325
12.3.2	Center for Advanced Microelectronics Manufacturing (CMM) .....	332
12.3.3	Kodak's Flexible Backplane.....	335
12.3.4	European Union Projects.....	341
12.4	Photovoltaics .....	349
12.4.1	Iowa Thin Film Technologies .....	349
12.4.2	Unisolar .....	351
12.5	Radio Frequency Identification Tags .....	355
12.5.1	PolyIC.....	356
12.5.2	Alien Technology .....	357

## List of Figures

Figure 1.1	Notebook Computer Screen and Magazine in (left) Bright and (right) Dim Ambient Light.....	3
Figure 1.2	Comparison of Reflective LCD and iMoD Display .....	4
Figure 1.3	Relative Reflectance of Various Media.....	5
Figure 1.4	Competition between Diffuse and Specular Reflection .....	5
Figure 1.5	Relative Contrast of Various Media .....	6
Figure 1.6	Checkerboard Measurement of Contrast Ratio .....	6
Figure 1.7	Magnified Photo of Notebook Display Screen .....	7
Figure 1.8	Search Times to Locate Character Strings on Computer Screens and Paper.....	8
Figure 1.9	Dependence of Reading Rates on Dot Pitch and Font Size.....	8
Figure 1.10	Time to Visibility of Various Displays in Different Ambient Lighting Levels.....	9
Figure 1.11	Reading Speeds and Fatigue Levels for Fixed and Free Media .....	10
Figure 1.12	Prototype Electronic Sketch Pad .....	11
Figure 2.1	Johannes Gutenberg and His Printing Press .....	16
Figure 2.2	Impact of 15 <sup>th</sup> Century Printing Technologies.....	16
Figure 2.3	Consumption and Production of Printing Paper in US (left) and North America (right).....	17
Figure 2.4	Growth in Paper Use by Country 1992-2000.....	17
Figure 2.5	World Paper Consumption.....	17
Figure 2.6	US Plants with Offset Presses Categorized by Employee Number .....	19
Figure 2.7	US Printing Industry: Page Volume by Market Segment.....	19
Figure 2.8	US Annual Book Sales.....	19
Figure 2.9	US Magazine Ad Pages (Seasonally Adjusted) .....	20
Figure 2.10	Trends in Leisure–Time “Information” Gathering.....	20
Figure 2.11	Predicted Replacement of Traditional Printing by 2010 .....	21
Figure 2.12	US Printing and Writing Tonnage .....	21
Figure 2.13	US Print on Demand Market.....	22
Figure 3.1	Areal Growth in Flat Panel Displays .....	27
Figure 3.2	Revenue and ASP Growth in Flat Panel Displays.....	28
Figure 3.3	Concepts for Conformal Displays in Handheld Devices .....	30
Figure 3.4	Growth of Commercial Biosensor Market.....	31
Figure 3.5	Examples of Commercial Glucose Sensors .....	31
Figure 3.6	Personal Health Monitor with Conformable Display .....	32
Figure 3.7	Prototype Smart Cards with Electrophoretic Displays .....	35
Figure 3.8	Prototype Smart Card with P-OLED Display .....	36
Figure 3.9	Smart Card with User-Controlled Display .....	37
Figure 3.10	Smart Greeting Cards.....	38
Figure 3.11	Example of Electronic Shelf Label (ESL).....	41
Figure 3.12	Price Sensitivity of Potential Market Size for Smart Labels.....	41
Figure 3.13	Smart Tickets and Smart Labels.....	42
Figure 3.14	Smart Label for Blood Bag.....	43
Figure 3.15	Smart Skin Patch .....	43
Figure 3.16	Shelf Labels .....	44
Figure 3.17	Price Optimization Systems.....	44
Figure 3.18	Electronic Shelf-Label with PDLC Display.....	45
Figure 3.19	2003 Food Market Retail Sales Share by Dollar Volume .....	46
Figure 3.20	Nominal Supermarket Sales (1980-2005) .....	47
Figure 3.21	Number of Supermarkets with More than \$2 Million Annual Sales 1980-2003.....	48
Figure 3.22	Display Sales Price as a Component of the Electronic Shelf Label System Cost to the Retailer .....	49
Figure 3.23	GEB 1150 and GEB 2150.....	53
Figure 3.24	Sigma Book from Matsushita .....	54
Figure 3.25	EBR-1000 LIBRIé Book Reader from Sony.....	55

Figure 3.26	Han Lin V2 eBook Reader .....	57
Figure 3.27	Educational e-books from LeapFrog.....	58
Figure 3.28	Informational Display in Airports .....	59
Figure 3.29	Informational Sign with Electrophoretic Display.....	60
Figure 3.30	Monochrome Informational Signs .....	60
Figure 3.31	Promotional Signs with Limited Color .....	60
Figure 3.32	Promotional Banners .....	61
Figure 3.33	Support System for Digital Signs .....	61
Figure 3.34	US Outdoor Advertising Revenue, Growth and CAGR.....	62
Figure 3.35	Examples of Conformal Billboard Displays .....	64
Figure 3.36	Traveling Billboards.....	64
Figure 3.37	Simple Mechanical “Dynamic” Display.....	64
Figure 3.38	LED Displays Shine Brightly by Day and Night .....	65
Figure 3.39	Digital Ink Technology on Billboards in the UK and US.....	65
Figure 3.40	Share of Sign Companies by Technology .....	66
Figure 3.41	Geographical Distribution of Respondents .....	66
Figure 3.42	Predicted Growth of Narrowcasting Industry .....	67
Figure 3.43	Structure of the Narrowcasting Industry.....	68
Figure 3.44	Plasma Screens Used to Show Simple Static Images .....	68
Figure 3.45	Public Display Sales by Technology (000s).....	69
Figure 3.46	Public Display Pricing Forecasts.....	69
Figure 3.47	Forecasted Sales of Vacuum Fluorescent Displays (000s).....	70
Figure 3.48	Forecasted Sales of Vacuum Fluorescent Displays (\$M).....	70
Figure 3.49	Video Displays in Vehicles by Technology (000s) .....	71
Figure 3.50	Video Display Revenue in Vehicles by Technology (US\$M) .....	72
Figure 3.51	E-Ink Paper Display .....	74
Figure 3.52	Concept of Rollable Display .....	75
Figure 3.53	Center Facility Viewed from ASU Research Park Entrance .....	76
Figure 3.54	Collaborations and Output from the Flexible Display Center.....	77
Figure 3.55	Anticipated Prototype Displays from the Center .....	77
Figure 3.56	Evolution of Personal Displays for Military Applications .....	78
Figure 3.57	Prototype Cholesteric Display for Military Applications.....	78
Figure 3.58	Concepts of Flexible Immersive Displays for Training Simulations .....	79
Figure 3.59	Concept and Prototype of Immersive Desktop Display .....	79
